Driving transformation
in risk and insurance

MESSAGE FROM THE CEO

Welcome to Airmic, the “go to” place for risk and insurance thought leadership, current news, learning, events, and networking. Whether you are in the risk management and insurance professions, a related profession, or academia, and whether you are starting out or in a leadership role, membership of Airmic will help you to make better informed decisions about risk and insurance.

Organisations are rethinking how they keep up with the speed of new risks emerging, the profile of known risks changing and how risk management practices need to adapt. Managing risk today must be a dynamic and continuous process – and on every board meeting agenda.

The insurance industry is rising to the challenges of the future world, whether these be physical issues such as natural catastrophe and climate change or intangible issues such as information security or reputation. The industry is investing in technology and the improved management of data and analytics. New business models are surfacing as the industry repurposes to meet the demands of our members and the organisations they serve.

We have seen Airmic members stepping up to support their organisations at a strategic level and there has been an increase in the level of respect for the profession, with many examples of great collaboration with leadership and peers.

Airmic has excellent relationships with government, regulators, industry, and affiliate associations in the worlds of risk management, insurance, audit, accountancy, human resources, business continuity, security, and technology. We also maintain a close liaison with risk management associations in Europe, the US, Southern Africa, and Asia Pacific. We are proud to be a founding member of the global Resilience Alliance, working with colleagues from the Business Continuity Institute (BCI), the ASIS (global community of security practitioners) and the Institute of Workplace and Facilities Management (IWFM).

AIRMIC AND ESG

With growing global concern surrounding the achievement of Sustainable Development Goals (SDG) by 2030, all organisations are increasingly interested in understanding how they manage their material environmental, social and governance (ESG) opportunities and risks, and how they deliver positive ESG impact.

Internally, Airmic recognises that an understanding and integration of ESG factors into our strategic decision-making is increasingly critical to the long-term viability of our association. Externally, we are conscious of the role risk management and insurance have to play in managing ESG and the connectivity with Enterprise Risk Management (ERM) in our Member and Partner organisations.

As CEO, I am proud and delighted to be leading Airmic – it is exciting to be part of a profession at the very centre of global innovation and change!

Julia Graham,
CEO, Airmic

ABOUT AIRMIC

Airmic celebrates its Diamond Anniversary in 2023 and today is the UK's largest and most vibrant risk management and insurance association. We are growing through welcoming not only those in the risk and insurance professions, but also those from other risk-related roles, including company secretaries, general counsel, human resource professionals, security and information specialists, business continuity practitioners, company directors, and academics and students from some of the UK's leading universities and business schools. As such, we are in a strong position to provide networking and learning, to represent the views of our members, and to advocate for their needs within both industry and government.

Our members enjoy access to a wide variety of face to face and online events and learning experiences, networking, and special interest groups, supported by a competency framework and mentoring scheme, with a technical library and online research materials featuring work by some of the risk and insurance profession's brightest, most innovative, and experienced talent.

Advancing the future of risk and insurance

OUR PURPOSE

To champion the value of risk management and insurance in a changing world.

OUR GOALS

Connecting the Profession

We provide unrivalled networking and peer learning opportunities for our members. Whether at our annual conference, our topic, and technical forums, or in our industry groups of practice, Airmic is at the centre of a fast-growing community of risk professionals, providing opportunities for new networks to be built, existing ones to be strengthened, and for peers to share best practice and insights.

Education and Training

We support our members' learning and development at every stage of their career by offering valuable content, events and learning through our Learning and Development programme, which are CPD-accredited.

OUR MISSION

To drive transformation in risk management and insurance through our membership, partnerships and affiliate relationships.

Expert Thought Leadership

We are recognised as a centre of thought leadership in risk management, driving research, innovation, market efficiency and best practice across the risk and insurance sector and academia. We carry out in-depth research and work with academia to bring members strategic thought, technical guidance and practical reports to help them add value to their businesses and remain up to date on the latest industry knowledge.

Advocating for members

We strive to be a voice for our members on the issues directly affecting them. We build links with industry and government bodies to ensure member voices are heard in both the boardroom and the halls of political and regulatory power.

Supporting your professional journey

1

ENTRY

If you are qualified or newly qualified, you can develop your technical knowledge through the fastTrack Programme and EXPLAINED Guides, which provide the basic principles of risk and insurance.

2

EMERGING | NEWLY QUALIFIED

You can achieve more meaningful knowledge of skills and how to apply them by exchanging experiences with peers, attending the Airmic Academy and Business Excellence Programme, while deepening your knowledge with resources from the technical library, Airmic LIVE and Airmic TALKS.

3

ESTABLISHED | MID CAREER

If you wish to grow your knowledge and skills, you can attend special interest groups, lectures and roundtables, access supporting knowledge from the technical library, Airmic TALKS and Airmic LIVE. At this stage of your career, you may also consider joining the Airmic Mentoring Scheme as a reverse mentor.

4

EXCELLING | PRACTICE LEADER

If you are a practice leader in your field, you have opportunities to master knowledge and successful skills application by attending leadership development events, by leading or moderating at Airmic events, and by demonstrating commitment through regular participation in Airmic committees and leadership group roundtables.

5

AUTHORITATIVE | THOUGHT LEADER

If you are at the forefront of pioneering new knowledge and skills for yourself and others, Airmic offers you opportunities to contribute to research, attend leadership developments events, serve on the Airmic Board, chair committees, and present at external events as an Airmic ambassador.

What our members say

Airmic membership supports my professional development by providing the latest thinking, thoughts and insight on risk management. This ensures that as a risk professional in my organisation, I am fully on top of what is developing in the industry

Richard James,

Head of Risk & Insurance, Nuclear Transport Solutions

I have been a member of Airmic for 2 years and have found our Company membership to be invaluable as a young professional. Not only has the membership afforded me the opportunity to broaden my professional network through attending the Fastrack Forum and Annual ERM Forums, Airmic's membership allows me to keep abreast of developments in the risk management space, such as insurance regulation, cyber risk and ESG. What stands out about AIRMIC is the breadth of topics they cover, from prevalent political issues, to technology and global macroeconomic outlooks, there is something for every risk professional to benefit from.

Chloe Taylor,

Risk Analyst, Randall & Quilter Investment Holdings Ltd.

Airmic membership benefits my professional development as I get to work with Airmic on the issues of the day. I attend a lot of sessions which give me the opportunity to hear from peers and thought leaders to make sure I'm not missing anything and remain at the cutting edge of best practice.

Clare Ball,

Head of risk, Insurance & Internal Audit, Kier Group

If you are a young professional in the sector of resilience and want more of a grounding in business, risk and the professions future then I'd highly recommend Airmic's Business Excellence Courses and Leadership Masterclass Series. These have provided me access to speak and question leading thinkers and senior executives across the resilience sector providing me with unmissable learning and a renewed perspective. Skills I have learnt from these courses see daily use, without which I wouldn't be able to make the impact I do and seek the achievements I have.

Isaac Wheatley,

Senior Analyst, Crisis Management EMEA

The Airmic membership benefits individuals because as well as access to continuous learning, members are also supported through technical papers and special interest groups. Airmic gives risk & insurance professionals a solid foundation of support, which I think is unique in our industry.

Glenn Ellis,

Airmic Board member and Airmic ESG Ambassador

Why become an airmic member

As a member, you get to enjoy a wide range of workshops, webinars, technical guides, mentoring, and events that are there to support you throughout your career journey. These resources not only support your CPD goals but also connect you with a community of like minded peers - at no extra cost.

1. BE PART OF THE COMMUNITY

Learn from peers and build a network through member-led interest groups, covering a range of topics and industries.

2. LEARN, DEVELOP, LEAD

Multiple Learning and Development opportunities for members professional development at every stage of their career.

3. ATTEND CPD-ACCREDITED EVENTS

Our annual conference, a flagship event that attracts more than 1,500 people, is the highlight of our events programme, which provides members with workshops, hub sessions, high-profile speakers, and many unrivalled networking opportunities across different topics and locations, throughout the year.

4. GAIN KNOWLEDGE AND INSIGHT

Airmic carries out in-depth research and regularly publishes thought leadership articles, guides and surveys.

CLIMATE RISK MANAGEMENT SCHOOL

In collaboration with PARIMA and AXA Climate, we have launched the Climate Risk Management School, which aims to help our members understand the risks and opportunities associated with climate change.

Airmic Members have COMPLIMENTARY ACCESS to the Climate Risk Management School.
